

Nicole Hankwitz, Director, Cardiovascular/Thoracic, Neuroscience and Business Development at McLaren Greater Lansing was fortunate enough to be working with the Foundation when the idea of the Women's Giving Circle came to fruition. Nicole feels, "we are so lucky to have amazing female leaders in the hospital and in our community who want to come together to support healthcare in our community."

What she likes best about being part of the group is the chance to pool resources that help the hospital in impactful way. When asked why she continues to support the WGC, she said it's because, "I see the direct impact of this group in the hospital every day. The grants we vote on every year improve how we can care for our families in this community."
