

Dr. Alys Long, Anesthesiologist with Capital Area Anesthesia PC, got involved with the Women's Giving Circle after an invitation from her good friend Melissa Eyde to attend the December 2024 meeting. She enjoyed it so much, she joined that night and made a donation.

Dr. Long said, "I love that it is a group of motivated women from all areas of the community striving to make the greater Lansing area better, and healthcare more accessible to everyone. Even though we are a part of the hospital, many of these women are leaders in our community and not directly involved in patient care, yet they're still eager to help others in need. " She continues to be part of the WGC because she loves what the group stands for and is always looking for ways to give back to her community.
